PROJECTS

ROAD SIGNS QUIZ

- Created a web app to quiz yourself on the 661 road signs found in Europe but mainly in the UK and Cyprus
- Organised a team of 4 students from CUT to get feedback and improve the look and feel of the website
- The technologies used in this project are ReactJS for the build, GitHub to store, host, and serve the website, and jsDelivr to deliver the road sign images to the site
- Helped 3 friends pass their driving exam by strengthening their knowledge of the local road signs

PERSONAL PORTFOLIO WEBSITE

- Built a personal portfolio website showcasing projects and information about me as a student and an aspiring web developer
- Also used my colleagues' opinions to make sure the website both looks and performs as intended
- The technologies used in this project are ReactJS, HTML and CSS for the build, and GitHub to store, host, and serve the site

E-COMMERCE FOOD SHOP

- Made a mock food shop website where users can add various fruits and vegetables to their carts and view those items all in a single page
- Used ReactJS, HTML/CSS, React Router 6, GitHub for storage and serving purposes, and jsDelivr to serve the product images to the site
